EDUCATION

University of Pennsylvania <i>M.S. in Biostatistics</i>	May 2023
Mount Holyoke College <i>B.A. in Statistics, Data Science. Summa Cum Laude</i>	May 2021

SKILLS

Languages: R, Python, SQL, SAS, Java, L^AT_EX, French (intermediate), Vietnamese (native)
Tools: Git/GitHub, Jupyter Notebook, VS Code, PyCharm

INDUSTRY EXPERIENCE

Genentech Inc. <i>Data Scientist, South San Francisco, CA</i>	Jun. 2023 –
<ul style="list-style-type: none"> Provide clinical statistical analysis and R/SQL/SAS programming support to different therapeutic areas Manage SDTM mapping, ADaM derivation, and TLG delivery to clinical scientists across Product Development Collaborate cross-departments to develop computational tools and support study design through real-world data 	
Regeneron Pharmaceuticals Inc. <i>Biostatistics Intern, Tarrytown, NY</i>	Jun. – Aug. 2022
<ul style="list-style-type: none"> Quantified physical activity with arctools R package to generate analysis for minute-level accelerometry data Investigated physical activity variability through intraclass correlation: independent, auto-regressive, exchangeable 	

ACADEMIC EXPERIENCE

University of Pennsylvania <i>Graduate Research Assistant, Philadelphia, PA</i>	Sept. 2021 – May 2023
<ul style="list-style-type: none"> MS thesis: Evaluated a novel prognostic score-based weighting approach for facility profiling metrics Worked on kidney disease related projects in R to estimate causal effects of transplant centers, multiple wait-listing, HCV-infected kidney transplants on survival with Cox PH, time-dependent Cox, IPTW, propensity score matching 	
Institute for Pure and Applied Mathematics <i>Research Fellow, Los Angeles, CA</i>	Jun. – Aug. 2021
<ul style="list-style-type: none"> Developed physics-informed neural networks with regularization to simulate wave propagation in Python Designed optimal network architecture with PDEs and boundary/velocity conditions of the wave equation 	
Memorial Sloan Kettering Cancer Center <i>Research Fellow, New York City, NY</i>	Jun. – Aug. 2020
<ul style="list-style-type: none"> Evaluated how bilirubin change affects survival in cirrhosis with Cox PH, time-dependent Cox, and Joint Model Wrote R functions to extract interval endpoints and event statuses from patients' enrollment time 	
Mount Holyoke College <i>Undergraduate Research Assistant, South Hadley, MA</i>	Jun. 2019 – May 2020
<ul style="list-style-type: none"> Contributed to <i>ncopula</i> R package to develop nested Archimedean copula models for dependent data Designed unit tests to examine the package functionality and provided reproducible documentation
